Dear Mrs Williamson:

Your letter got lost in my desk (which I cleaned out today) but I thought of you often and told others about hearing from you.

How fine it would be if you and Dr Williamson could work among the Japanese Americans. many of whom I feel sure are innocent of anything but have had to be shoved around because of the war.

I did think I might have an inquiry from the government before I wrote you but have none as yet. Of course I could only say the finest things about you. and I have remembered you in my prayers.

I was glad to know your address and would like to know your new address if you move and the kind of work you are doing.

You both (and the boy) have many warm friends in First Church Macon and we are always glad to have any word from you.

I have wondered if the son is old enough for the war. We remembered him on our prayer calendar recently - he was listed as a Margaret Fund student.

With best wishes for you all

Sincerely

Kati C. Fiske
